

Sarah GONIN

Fullstack Developer, UX/UI Designer

(+33) 672 179 299 | goninha@outlook.fr | Montpellier, France | [LinkedIn](#) | [Github](#) | [Website](#)

PROFILE

Full-stack developer with a strong UX focus, I help teams design and improve digital products that are both reliable and user-centered. From back-end architecture to polished interfaces, I build intuitive, high-performing solutions that effectively address real user needs. Autonomous and proactive, I bring a structured, results-driven approach to every project.

SKILLS

Back-end Databases	Java, Spring, Python, Django, Node.js, Firebase, SQL, NoSQL
Front-end	HTML5, CSS3, SASS, Bootstrap, TailwindCSS, Motion, Material UI, JavaScript, ES6, AJAX, React, Redux, Next.js, Angular
Project Management and Tools	Git, CI/CD, Docker, Maven, Jenkins, Figma, InDesign, Jira, SCRUM
Languages	French, English, Vietnamese

PROJECTS

🔗 Airsen Project Collaboratif Code source Environmental data platform (air quality, weather, demographics): - Full-stack application aggregating multi-source data with secure APIs, Redis caching, and performance optimization to handle rate limiting constraints - Built and integrated interactive interfaces for data exploration and visualization - Stack : Spring Boot, Maven, Angular, MariaDB, Docker, Redis, CI/CD Sep - Dec 2025
🔗 Homecook Collaborative project Source code Website A web app for recipe - Developed RESTful APIs for recipe creation, storage, and search by category and ingredients - Added user authentication for login, logout, password management, and recipe management - Utilized UX/UI principles in designing a responsive interface with TailwindCSS - Tech stack : Django, PostgreSQL, Next.js Jan - Mar 2023
🔗 Freshmeals Collaborative project Source code Website An e-commerce site that sells organic products - Implemented Firestore API for database and user authentication - Managed shopping cart and reduced form error 50% with form validation - Filtered and searched products, with responsive design and pagination - Tech stack : React, React-Router, Redux, Firebase Cloud Firestore, TailwindCSS Oct 2022 - Jan 2023

EXPERIENCES

🔗 Full-stack developer - IMIN - Application mobile Do&Go Castrie, France Developed and tested Node.js API: 98.2% backend regression success rate, Redis cache integration in production Built Middle Office dashboard with data visualizations and performance benchmarking Led full UI redesign of the mobile app (Figma → Flutter): implemented light and dark mode Dec 2025 - Avril 2026
🔗 Hackathon Tech Collaborative project Castelneau-le-lez, France Created and developed the CoPha web application using .NET Core and Next.js, executed in 2 days Awarded for excellence in UX/UI design 17 - 18 Oct 2024

EDUCATION

Full-stack Developer - Java & Angular (Bachelor's equiv.) Diginamic Montpellier, France	Jun 2025 - Mar 2026
Front-end Developer Bootcamp (intensive program) Codegym JSC online	Jan - Oct 2022
Certificate in Program with Python Coursera online	Oct - Dec 2021
Master Management Sport Tourism University of Montpellier France	2014 - 2016
Bachelor of Translation & Interpreting (English) Hanoi Open University Vietnam	2009 - 2013
